**Questão: /Question:**

Hello Celso,

I briefly met you during your visit to Mondi in South Africa and you mentioned the names of two mill's in Brazil with very low water consumption (very good water use efficiency). Please could you let me have the names of these two mills as I am interested in finding out more about what they have done to reduce their water consumption.

Regards

**Gladys Naylor**  
Environmental Manager

South Africa Division

**Mondi**

Merebank Mill

Travancore Drive, Merebank, 4052

P.O. Box 31024, Merebank, 4059, South Africa

---

**Resposta por Celso Foelkel: / Answer by Celso Foelkel:**

Good morning Gladys, thanks for your message.

The two mills are:

Lwarcel

<http://www.lwart.com.br/site/content/lwarcel/default.asp?idioma=2>

and

Fibria – Jacarei pulp mill

<http://www.fibria.com.br/web/en/negocios/celulose/jacarei.htm>

They are informing total water consumption below 25 m<sup>3</sup>/adt of bleached pulp – new water intake – and not effluent generation.

I hope you may visit them.

Regards

Celso
